

1	Course Name:
	Digital Visual Effects
2	Course Code:
	IAB40103
3	Year and Semester Offered:
	Year 2 Semester 2
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	IMB20403 Digital Audio and Video Production IMB21103 3D Computer Animation
6	Course Synopsis: This course designed to educate the students the proper ways of designing and creating visual effects for animation, film and various media. Students will learn and apply the methods and techniques of producing digital visual effects according to the needs of the media. The contents include a wide range of multidimensional media and various forms of digital effects that help students to create visual effects from their creative minds. The course covers; History of VFX, Digital Imaging, VFX Technology, Masking, Rotoscoping, Matte Painting, Particle, Compositing and Camera Match-moving.
7	Course Learning Outcome: Upon completion of the course, students should be able to: 1. Describe the visual effect cues based on visual effects pipeline in production. 2. Constructs quality composites by using standard keyers, rotoscoping, motion tracking, procedural matte creation and image compositing tools. 3. Classify techniques to integrate visual effects in animation, film or other digital entertainment forms.
8	Content Outline:
	Topic
	1. Introduction to Visual Effects
	2. VFX Digital Compositing Tools
	3. The Art of Masking
	4. VFX Pipeline and Techniques
	5. Digital Matte Painting
	6. 2D Image Compositing
	7. Digital Image Tracking
	8. Camera Tracking

	9. 3D animation integration
	10. Time Remapping Techniques
	11. Basic Particles
	12. Computer Generated Imagery
	13. Computer Generated Imagery
	14. Showcase & Critiques
