

1	Course Name:
	Embedded System
2	Course Code:
	IBB22703
3	Year and Semester Offered:
	Year 2 Semester 2
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	IBB2024 Microprocessor & Microcontroller System
6	Course Synopsis:
	This course introduces students to the real-time embedded system hardware and software from an application development viewpoint, as opposite to an operating system viewpoint.
7	Course Learning Outcome:
	Upon completion of the course, students should be able to: 1. Explain the methods and problems of developing embedded system applications. 2. Develop embedded systems for engineering applications. 3. Formulate proposal using project management skills.
8	Content Outline:
	Topic
	1. Introduction to Embedded Systems
	2. Embedded Architectures of Embedded Processors
	3. Operating System
	4. Peripherals Interfacing
	5. Embedded Networking
	6. Embedded System Application
	7. Embedded Project Management
	- Project plan, Design and Documentation
