

1	Course Name:
	Acquisition and Visualization Analytics
2	Course Code:
	IDG60403
3	Year and Semester Offered:
	Year 1 Semester 2
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	NA
6	Course Synopsis:
	This module discusses on how best to make sense of voluminous data and potentially fast-changing information, especially when data is used to decide in real-time situations (for examples, investments, policies, trades and new markets etc.) or to be presented to broader audiences. The use of data visualization is increasing in the digital era where much information is consumed with colourful displays. Rapid innovation of new data visualization techniques will be implemented to solve such purpose. In addition, the visual aspects of data analytics and the emerging professional practices of turning numbers into pictures or more specifically, into screen realities are included.
7	Course Learning Outcome:
	Upon completion of the course, students should be able to: 1. Analyse data visualization, on the work-practices for the best results of the data analytics in service design, marketing and institutional reputation management. 2. Commission and access online data analytic tools with appropriate services based on the requirements. 3. Demonstrate the practical benefits and limitations of data visualization for organizational decision-making..
8	Content Outline:
	Topic
	1. The Importance of Data Visualization
	2. Data Gathering and Cleaning
	3. Data Exploring and Analysis
	4. Data Visualization
	5. Case Studies
