

1	Course Name:
	Computer Network - A Business User's Approach
2	Course Code:
	IEB21703
3	Year and Semester Offered:
	Year 2 Semester 2
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	NA
6	Course Synopsis:
	This course is offering a comprehensive introduction to computer networks and data communications. Covering of the basic features, operations, and limitations of different types of computer networks as well as the effects of data communications on business and society. Making it the ideal course for future business managers, computer programmers, system designers, as well as home computer users.
7	Course Learning Outcome:
	Upon completion of the course, students should be able to: 1. Explain the computer network communications using network models. 2. Relate the computer network applications with business/corporate networks. 3. State the computer network concepts in business/corporate environment.
8	Content Outline:
	Topic
	1. Introduction to Computer Network
	2. Network Architecture
	3. Fundamentals of Data and Signal
	4. Communication Media
	5. Fundamentals of Local Area Network
	6. Network Design
	7. Network Security: The Basics
