

1	Course Name:
	C Programming
2	Course Code:
	IIB11503
3	Year and Semester Offered:
	Year 1 Semester 1
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	NIL
6	Course Synopsis:
	This course covers topics from basic C programming to basic data structure such as Array and struct. Text and Binary Files I/O are also used to store data and record of database. Using all the concept student will apply to design and create a simple database application using C programming language.
7	Course Learning Outcome:
	Upon completion of the course, students should be able to: 1. Explain the concept of application programming in C. 2. Apply the concept to design and create a simple database application. 3. Identify usage of different data structure in application programming.
8	Content Outline:
	Topic
	1. Introduction
	2. Control Structure
	3. Function
	4. String
	5. Data Structure: Array & Pointers
	6. Data: File I/O
	7. Data Structure: struct
	8. Applications
