

1	Course Name:
	Data Analytics
2	Course Code:
	IIB30104
3	Year and Semester Offered:
	Year 3 Semester 1
4	Credit Hours Value:
	4 Credit Hours [4 SLT Credit]
5	Prerequisite(s), if applicable:
	- IBB32403 Data Science Essential - IGB20303 Probability and Statistics for IT - IIB20203 Machine Learning
6	Course Synopsis:
	RapidMiner tools enable an easy-to-understand view of the process by abstracting away the programming details so that complex data mining processes are communicated, exchanged, and illustrated effective and efficient manner. Students learn to use RapidMiner to solve real scenario business scenario such as financial, education, and marketing.
7	Course Learning Outcome:
	Upon completion of the course, students should be able to: 1. Apply a classification model based on financial and education use cases. 2. Develop a customer behaviour model based on affinity-based marketing use cases. 3. Apply an association rules model based on cross-selling use cases.
8	Content Outline:
	Topic
	1. Introduction
	2. k-Nearest Neighbor Classification I • Teacher assistant evaluation use case
	3. k-Nearest Neighbor Classification II • Glass type identification use case
	4. Näive Bayes Classification I • Credit approval use case
	5. Näive Bayes Classificaton II • Nursery school application rank use case
	6. CRISP-DM • Affinity-Based Marketing use case

	7. Association Rule Mining • Retailer's market basket analysis
