

1	Course Name:
	IT Security Essentials
2	Course Code:
	IKB10403
3	Year and Semester Offered:
	Year 1 Semester 1
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	NA
6	Course Synopsis: This course aimed to provide students with the fundamental concept of Information Technology which form the foundation for their study in later years. This course also provides students with the comprehensive study of basic information security concepts; principles and practices, common attacking techniques, basic cryptographic tools, authentication, access control, software security and management in information security. Understanding these techniques will help them determine what is the best method and solution to secure the confidential information in the organization.
7	Course Learning Outcome: Upon completion of the course, students should be able to: 1. Describe knowledge of fundamental of Information technology and asset in organization. 2. Demonstrates with peer to utilize principles concept of information security, basic approach, technologies and issues in securing digital assets. 3. Propose appropriate devices to secure information assets in business.
8	Content Outline:
	Topic
	1. Introduction to Information Technology
	2. Data Communication and Computer Network
	3. Mobile and IOT Technology
	4. Introduction to Information Security
	5. Risk , Threats and Vulnerabilities
	6. Software & Hardware Based Attacks
	7. Network Vulnerabilities and Attacks
	8. Access Control Fundamentals
	9. Cryptography

	10. Contingency Planning
