

1	Course Name:
	Cyber Forensics
2	Course Code:
	IKB42503
3	Year and Semester Offered:
	Year 3 Semester 1
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	NIL
6	Course Synopsis: Cyber forensic offers a systematic approach to perform comprehensive investigation in order to solve cybercrimes. Organizations are now realizing that evidence retrieved from computers and other digital media are becoming more relevant to convicting hackers and criminals. Though this digital evidence can be powerful, but if it is not retrieved through proper investigative procedure, it can be easily damaged. The course covers both the principles and practice of digital forensics, inclusive of techniques, tools and technology that can be used for collecting, examining, and analyzing data from different type of devices. It also provides hands-on experience in different cyber forensics situations that are applicable to the real world. Students will learn different aspects of digital evidence: ways to uncover illegal or illicit activities left on disk and recovering files from intentionally damaged media with computer forensics tools and techniques.
7	Course Learning Outcome: Upon completion of the course, students should be able to: 1. Demonstrate the principal of digital forensics and ethics in regards to digital evidence. 2. Construct forensic examination and analysis using a variety of tools. 3. Apply various forensic technique to solve forensic cases.
8	Content Outline:
	Topic
	1. Introduction to cyber forensics & investigation
	2. Digital Forensics Investigation process
	3. Understanding Hard Disk and File Systems
	4. Digital forensics tools
	5. Digital evidence Acquisition & Duplication
	6. Anti Forensics
	7. Internet and Email
	8. Network Forensics Networking Fundamentals Network Security Tools Network Evidence

	9. Mobile Forensics
	10. Evidence Reporting
