

1	Course Name:
	PRINCIPLES OF COMPUTER PROGRAMMING
2	Course Code:
	ISB10103
3	Year and Semester Offered:
	Year 1 Semester 1
4	Credit Hours Value:
	2 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	NA
6	Course Synopsis:
	This course provides the fundamental knowledge to begin programming in any language. Students will learn and explore the core syntax of the selected programming language. This course covers the fundamental concepts of computer programming, logical thinking, selection, repetition, arrays, methods, objects, classes and problem solving.
7	Course Learning Outcome:
	Upon completion of the course, students should be able to: 1. Produce algorithm based on correctly identified analysis table. 2. Build full program using appropriate IDE tools. 3. Develop solution based on given problems.
8	Content Outline:
	Topic
	1. Introduction To Programming
	2. Analyzing a Problem
	3. Designing an Algorithm for Sequential & Selection Control Structure
	4. Designing an Algorithm for Repetition Control Structure
	5. Programming with Java
	6. Arrays
	7. Methods
	8. Introduction to Object-Oriented Technology
	9. A Closer Look to Classes and Objects
