

1	Course Name:
	Object-Oriented Programming
2	Course Code:
	ISB16003
3	Year and Semester Offered:
	Year 1 Semester 2
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	ISB 10103 Principles of Computer Programming OR IBB 11503 C Programming
6	Course Synopsis: This course explores the theory of object oriented, syntax of the language, creation of graphical user interfaces (GUI), exceptions, files input/output (I/O), threads and networking. Students are able to develop applications using OO technology. This course uses Java Software Development Kit (JDK) and Integrated Development Environment (IDE) such as Eclipse, JCreator or Netbean.
7	Course Learning Outcome: Upon completion of the course, students should be able to: 1. Demonstrate the understanding of object-oriented programming principles through the use of UML diagrams and code segment examples. 2. Apply the object-oriented programming principles into written java Codes by reusing existing library classes. 3. Construct object-oriented programs or applications using Java for producing computerized solutions to informations systems problems.
8	Content Outline:
	Topic
	1. Introduction
	2. Class Design
	3. Advanced Class Features
	4. Exceptions
	5. Text-Based Applications
	6. Building OO GUI
	7. GUI Event Handling
	8. Advanced GUI
	9. Threads

	10. Networking
