

1	Course Name:
	Introduction to Software Engineering
2	Course Code:
	ISB16103
3	Year and Semester Offered:
	Year 1 Semester 1
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	NIL
6	Course Synopsis: This course provides fundamentals of modern software engineering, together with the tools, methods and techniques that support their application. It offers fundamental knowledge about the technological advances that are changing rapidly from software requirements and model to project management and software testing.
7	Course Learning Outcome: Upon completion of the course, students should be able to: 1. Present the understanding of software engineering practice through its concepts, principles and methods. 2. Discuss the use of CASE tools to support the software process activities. 3. Apply various Software Engineering techniques to solve problems in software development environment or project.
8	Content Outline:
	Topic
	1. Introduction to Software Engineering
	2. Software Process
	3. Software Requirements
	4. Requirement Engineering Process
	5. Software Models
	6. Project Management
	7. Methods
	8. Software Cost Estimation
	9. Software Testing
