

1	Course Name:
	Software Requirements Engineering
2	Course Code:
	ISB26404
3	Year and Semester Offered:
	Year 2 Semester 1
4	Credit Hours Value:
	4 Credit Hours [4 SLT Credit]
5	Prerequisite(s), if applicable:
	NIL
6	Course Synopsis: This course is designed to provide students with fundamental concepts of software requirements engineering relating to eliciting, analysing, documenting and managing software requirements. This includes its importance in the software development lifecycle and its impact on project completion and success.
7	Course Learning Outcome: Upon completion of the course, students should be able to: 1. Apply the knowledge of requirements engineering processes. 2. Analyse requirements problem based on various information system case studies. 3. Demonstrate requirements management practices using systematic requirements engineering approaches in various business domains.
8	Content Outline:
	Topic
	1. Introduction and Framework for Requirements Engineering
	2. System and Context Boundaries
	3. Requirements Elicitation
	4. Requirements Specification
	5. Documenting Requirements in Natural Language
	6. Model-Based Requirements Documentation
	7. Requirements Validation and Negotiation
	8. Requirements Management
	9. Tool Support
