

1	Course Name:
	Software Design and Integration
2	Course Code:
	ISB26504
3	Year and Semester Offered:
	Year 2 Semester 1
4	Credit Hours Value:
	4 Credit Hours [4 SLT Credit]
5	Prerequisite(s), if applicable:
	ISB16003 Object Oriented Programming
6	Course Synopsis:
	This course will expose the students on solving a software design problem. It requires students to understand the design principles, software quality, various models and standards, as well as having case studies for them to analyze.
7	Course Learning Outcome:
	Upon completion of the course, students should be able to: 1. Demonstrate their understanding on the design principles and integration. 2. Analyze the appropriate design techniques and follows the software construction process based on a given problem/case study. 3. Organizes a software process for the software project to track and monitor its activities and outcomes.
8	Content Outline:
	Topic
	1. Introduction to Software Design and Integration
	2. Towards Object Technology
	3. Software Quality & Criteria of Object Orientation
	4. Concept of Class Design Principles
	5. Overview of Component, Architecture and Framework
	6. Framework Model View Controller (MVC)
	7. Patterns in the Real World
	8. Java Software Solutions
	9. Categories of Design Patterns
	10. Issues and future of Software Design and Integration
