

1	Course Name:
	Web Application Framework
2	Course Code:
	ISB46103
3	Year and Semester Offered:
	Year Semester
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	NIL
6	Course Synopsis:
	This course covers the development of dynamic web applications with SQL Server database using C# programming language. In this course, student will learn ASP.NET web forms scripts and the basic of C# programming language. The course includes web form basics, input validations, master pages, navigation controls, cascading style sheets and login controls. This course will also introduce students to the ADO.NET data access technique.
7	Course Learning Outcome:
	Upon completion of the course, students should be able to: 1. Build user interface using web and data controls and write programming methods within the Integrated Development Environment (IDE). 2. Accommodate good communication, teamwork, leadership, problem solving and lifelong learning. 3. Analyze appropriate techniques to solve the application problems.
8	Content Outline:
	Topic
	1. Introduction to ASP.NET
	2. Creating ASP.NET Web Form
	3. Adding Code to Web Form
	4. Validating User Input
	5. Creating Master Pages and User Controls
	6. Using Cascading Style Sheet
	7. Creating, Manipulating and Querying Database Tables
	8. Assessing Data with Data Source and Data Web Controls
	9. Creating and Calling Stored Procedures
	10. Creating User Account and Authentication Page

	11. Deploying a Microsoft ASP.NET Web Application
