

1	Course Name:
	Principles of Artificial Intelligence
2	Course Code:
	ISB46703
3	Year and Semester Offered:
	Year 4 Semester 1
4	Credit Hours Value:
	3 Credit Hours [3 SLT Credit]
5	Prerequisite(s), if applicable:
	ISB16003 Object Oriented Programming
6	Course Synopsis:
	This course covers an overview of the main thrusts in artificial intelligence, starting with the historically symbolic, logic-based approaches to knowledge representation, planning, reasoning and learning, leading directions of statistics-based probabilistic approaches. The course also touches on more recent developments in machine learning and philosophical foundations.
7	Course Learning Outcome:
	Upon completion of the course, students should be able to: 1. Classify characteristics of programs that can be considered "intelligent". 2. Apply appropriate searching techniques in achieving desired goal. 3. Calibrate knowledge using various different techniques.
8	Content Outline:
	Topic
	1. Introduction to Artificial Intelligence
	2. Problem Solving and searching
	3. Knowledge and reasoning
	4. Learning
	5. Communication, Perception and action
	6. Philosophical Foundation
